

I do a lot of travelling in the North East around New York, Boston and Philadelphia in my car equiped with XM Radio. Knowing exactly where I can find traffic and weather information on XM Radio when I am in these metropolitan areas is an excellent service. It means I don't have to scan endless local stations to try and find the information I am looking for. This means I can concentrate on what I am meant to be doing, and that is driving.

As a very happy customer of XM Radio, I would urge you to reject the NAB's petition 04-160 as this would diminish the XM Radio product which I pay a monthly charge for.

Kind Regards,

Jason Beillingham
